

EXHAUST PIPE SHAPERS

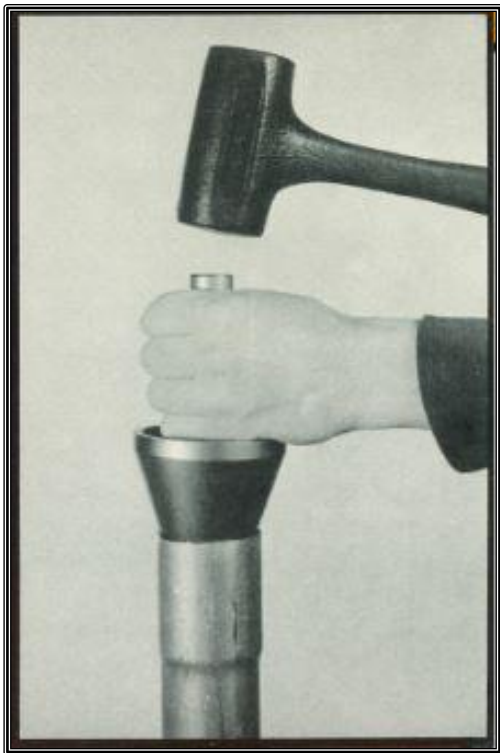

- Repairs dented and damaged pipe ends
- Makes fitting pipes easier
- Eliminates Waste

Machined, welded and heat treated – the “Shaper” is a simple yet effective tool made to repair dented and damaged pipe ends or muffler inlets and outlets.

Designed to re-shape both the inside and the outside of pipe without the use of electrics, pneumatics or hydraulics – the tools are virtually maintenance free.

Works on pipe
up to
3” or 5”

Part Number 984
End Shaper for
Pipes Up to
3" in Diameter

Part Number 982
End Shaper for
Pipes from 2" to
5" in Diameter

Easy to use:
Simply insert the tapered end into the pipe or reverse it and place the cone over the outside of the pipe and tap with a hammer.
